Exclusive Option

Note for Easy and Style options: the two options distinguish also for the features of the furniture. These options refer to a 18 sqm booth, therefore if the requested area exceeds 18 sqm (1 unit), the quantity of furniture and accessories will be calculated multiplying the 18 sqm supply for the numbers of occupied units. In case of an area which does not correspond to the 18 sqm multiple, furniture and accessories will be assigned as for 18 sqm (example 27 sqm furniture for 18 sqm; 40 sqm furniture for 36 sqm). Independently from the occupied area, the supply of 1 closet of 1x1 meters, electrical connection 230 V with an installed power of 3 KW, 1 frame with the name of the Company (this last point is valid for Easy option only) won't be changed. Free replacements of furniture and materials are not allowed, therefore if the Exhibitor needs some different pieces of furniture or materials, he will be compelled to return the ones not needed and order new ones. The rendering do not intend to illustrate the technical characteristics of the product, having exclusively demonstrative purposes.
